

# Infertility in Endometriosis & Adenomyosis

## The Integrated Approach

Pre-Congress  
Workshop 3

Workshop Theme:

**“Repair, Restore, Reproduce: Fertility-Focused Innovation in Endometriosis and adenomyosis”**

### Brief Overview:

This workshop focuses on the fertility-oriented evaluation and treatment of endometriosis and adenomyosis. It includes a mix of evidence-based protocols, hormonal therapies, surgical options, and newer non-invasive technologies like LUMWA (Laparoscopic Ultrasound-guided Microwave Ablation) for adenomyosis.

### Features Include:

- Decision-making in fertility-sparing surgeries
- Hysteroscopic and laparoscopic fertility-enhancing interventions
- Introduction to LUMWA – indications, techniques, and outcomes
- IVF strategies in deep and recurrent endometriosis

### Who Should Attend:

- Reproductive medicine specialists
- Gynecologists treating subfertility and endometriosis
- IVF consultants and laparoscopic surgeons
- Fellows in REI and MIS

### Why You Should Attend:

- Gain clarity on surgery vs. IVF timing
- Learn to manage adenomyosis and AMH challenges
- Understand where LUMWA fits in the fertility algorithm
- Network with leaders across fertility specialists and surgeons

### What You'll Achieve:

- A fertility-centric approach to endometriosis and adenomyosis
- Familiarity with LUMWA and thermal ablation techniques
- Protocols to integrate surgery and ART in your practice
- Multidisciplinary understanding of reproductive endo-care
