

# Deep Endometriosis Surgery

From Complexity to Confidence

Pre-Congress  
Workshop 4

Workshop Theme:

## “Tackling the Toughest: Advanced Techniques & Complication Management”

### Brief Overview:

This surgical workshop focuses on deep endometriosis, covering bowel, bladder, ureters, parametrium, nerves, and beyond. It combines video-based case discussion, live commentary, and dedicated sessions on intraoperative decision-making and complication rescue techniques.

### What's Included:

- Surgical videos of complex pelvic surgeries
- Tips for ureteric dissection, nerve-sparing techniques
- How to manage bleeding, organ injury, conversions
- Real-world discussions on consent, recurrence, and multidisciplinary collaboration

### Who Should Attend:

- Advanced laparoscopic/robotic gynecologists
- Surgeons involved in complex endo care
- Colorectal/urological collaborators
- Senior postgraduates and fellows

### Why You Should Attend:

- Watch complex surgeries and surgical errors
- Learn how to prevent, recognize, and manage intraoperative complications
- Gain tips from surgeons who routinely handle the most difficult cases
- Build skills in consent, documentation, and post-op care

### What You'll Achieve:

- A stepwise surgical approach to deep infiltrating endometriosis
- Complication prevention and rescue pathways
- Enhanced readiness to manage bowel, bladder, and nerve involvement
- Increased surgical confidence and clarity
