

MRI in Endometriosis

The Gold Standard for Deep Disease Detection

Pre-Congress
Workshop 5

Workshop Theme:

**"Decode the Depths: Reading Endometriosis
Like a Pro"**

Brief Overview:

This expert-led MRI workshop offers an immersive learning experience for mastering MRI interpretation in endometriosis. Featuring live reporting, structured interpretation templates, and hands-on MRI station review, this session ends with a certification course for all attendees (To ensure a full participation in the certification module, please carry a laptop with you)

The program includes:

- Core MRI protocols and their application
- High-resolution case studies and reporting exercises
- Faculty-led interpretation of anonymized MRIs
- Final certification with supervised assessments

Who Should Attend:

- Radiologists and imaging specialists
- Gynaecologists and surgeons involved in advanced endometriosis care
- Fertility experts and pain specialists
- Fellows and senior trainees

Why You Should Attend:

- Learn from international and Indian MRI experts
- Build confidence in identifying bowel, ureter, bladder, and sciatic endo
- Use reporting templates aligned with surgical decision-making
- Complete a structured certification course with case-based assessments

What You'll Achieve:

- Skill in reading MRIs with surgical correlation
- Ability to generate standardized reports for DIE
- Certificate of competency in MRI-based endometriosis reporting
- Enhanced interdisciplinary communication between radiologists and surgeons
